Women Who Wear Well.

It is astonishing how great a change a few years of married life often make in the appearance and disposition of many women. The freshness, the charm, the brilliance vanish like the bloom from a peach which is rudely handled. The matron is only a dim shadow, a faint echo of the charming maiden. There are two reasons for this change, ignorance and neglect. Few young women appreciate the shock to the system through the change which comes with marriage and motherhood. Many neglect to deal with the unpleasant pelvic drains and weaknesses which too often come with marriage and motherhood, not understanding that this secret drain is robbing the cheek of its freshness and the form of its

fairness.

As surely as the general health suffers when there is detengement of the health of the delicate womants organs, so surely when these organs are established in health the face and the at once witness to the fact in reserved comeling. Nearly a million women have found health and happiness in the use of Dr. Pierce's Favorite Prescription. It makes weak women to the properties of vorite Prescription. It makes weak women strong and sick women well. Ingredients on label-contains no alcohol or harmful habit-forming drugs. Made wholly of those native, American, medic-

wholly of those native, American, medicinal roots most highly recommended by leading medical authorities of all the several schools of practice for the cure of woman's peculiar aliments.

For nursing mothers, or for those brokendown in health by too frequent bearing of children, also for the expectant mothers to prepare the system for the coming of baby and making its advent easy and almost painless, there is no medicine quite so good as "Favorite Prescription" it can do no harm in any condition of the system. It is a most potent invigorating tonic and strengthening nervine nicely adapted to woman's delicate system by a physician of large experience in the treatment of woman's peculiar allments.

physician of large experience in the treat-ment of woman's peculiar allments.

Dr. Pierce may be consulted by letter free of charge. Address Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y.

PLANTING SCHOOL YARDS.

(eep the Interior Open and Place Shrubs on the Sides.

Keep the center of the school grounds free. Do not scatter the trees and shrubs over it. They will be in the way. The boys will break them down Moreover, they do not look well when scattered over the whole area. When an artist makes a picture with many people in it he does not place the persons one by one all over his canvas. He masses them. Thereby he secures a stronger effect. He focuses attention rather than distributes it. Most persons make a yard a nursery by planting trees all over it. The same trees and shrubs can be used to make either a nursery or a picture.

Begin with the fundamentals, not with the details. If an artist is to make a portrait be first draws a few bold strokes, representing the general outline. He blocks out the picture. With the general plan well in mind be cradually works in the incidentals and the details-the nose, eyes, beard Most persons reverse this natural order when they plant their grounds They first ask about the kinds of roses. the soil for carnations, how far apart hollyhocks shall be planted.

It is as if the artist first asked about the color of the eyes and the fashion of the necktle or as if the architect first chose the color of paint and then planned his building. The result of this type of planting is that there is a picture, not a mere collection of trees

STREET CLEANING'S VALUE.

How It Caused a Sickly Spot to Become a Health Resort.

"Not so very long ago the city of Vera Cruz, in the lowlying coast country of Mexico, was one of the sickliest spots on the continent; and because of its high death rate it was given a wide berth by natives and foreigners allke." said Julian D. Appling of Chicago to a reporter of the Baltimore American. Mr Appling is interested in a large sugar estate near the above mentioned town and is thoroughly familiar with conditions in the sister republic.

"The old, sinister reputation of Vera Cruz," be continued, "has been entirely obliterated, thanks to the talents and good offices of one man, an Englishman of the name of Samuel Pierson. a millionaire promoter and developer, who has invested large sums of money in the town and surrounding country What Pierson did was the simple act of instailing a flushing system by which the streets of the city got a daily washing. The streets once so dirty and prolific of disease now get a
